

# Participate in Research!

Nutrition researchers at the University of Idaho are seeking participants in a study to test a tool for measuring fermented food intake. We are looking for volunteers who are willing to record personal 24 hour recall and take a food frequency survey on your computer. If you are interested in participating in this study, please contact Annie Roe at [aroe@uidaho.edu](mailto:aroe@uidaho.edu) or call 208-885-1709.
